Summary

Computer Science Engineering student with experience in Generative AI, RAG systems, and React-based web applications. Built AI solutions using Llama3, LangChain, ChromaDB, and Ollama. Solved 400+ DSA problems on LeetCode and actively exploring AI Agents, Full Stack Development, and scalable software systems.

Technical Skills

- **Languages:** Python, TypeScript, JavaScript, C++, SQL, HTML5, CSS3
- **Frontend:** React.js, Tailwind CSS, Responsive Design
- **API:** REST, JSON, HTTP
- **Databases:** MongoDB, ChromaDB
- **AI/ML:** Machine Learning Fundamentals, Data Analysis, LangChain, LangGraph, Ollama, Llama 3, RAG Pipelines, Semantic Search, Vector Databases, Prompt Engineering, Agentic AI, LLM Integration
- **Tools:** Git, GitHub
- **Core CS:** Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks
- **Soft Skills:** Problem Solving, Analytical Thinking, Communication, Team Collaboration

Projects

DocuMind-AI | RAG PDF Chatbot | [GitHub](#)

- Built a RAG chatbot capable of answering questions from 100+ page PDF documents using Llama3, ChromaDB, and SentenceTransformers.
- Reduced retrieval latency through vector similarity search and semantic chunking.
- Applied PDF parsing, chunking, embedding generation, vector similarity search, and context-aware response generation.
- Engineered a fully local AI pipeline using Ollama and vector databases for efficient document retrieval and conversational AI.
- Integrated semantic search techniques to retrieve highly relevant context for accurate AI-generated responses.

Future Game Zone – SIH Team Project | [Live](#) | [GitHub](#)

- Worked as a **Frontend Developer** in a Smart India Hackathon (SIH) team project, collaborating with teammates to build an interactive gaming platform.
- Developed responsive and user-friendly interfaces using React.js, Tailwind CSS, HTML, CSS, and JavaScript.
- Built reusable UI components and implemented modern frontend design principles to ensure consistency and maintainability.
- Integrated frontend components with APIs and optimized application performance for a smooth user experience.
- Collaborated with the team using Git and GitHub for version control, feature development, and code integration.
- Focused on creating engaging, visually appealing, and mobile-responsive user interfaces to enhance overall usability.

AI Spend Audit Dashboard | [GitHub](#)

- Designed a responsive dashboard interface using React and JavaScript for analytics visualization.
- Built reusable UI components and optimized responsive layouts for improved user experience.
- Focused on clean UI design and efficient presentation of analytics-based data.
- Presented spending insights through intuitive visualizations, helping users better understand expense patterns and financial trends.

Achievements

- Solved **450+ problems** on [LeetCode](#)
- Completed [Google Cloud Generative AI Virtual Internship](#) (AICTE-EduSkills), gaining hands-on experience with Vertex AI, prompt engineering, and Generative AI applications.
- Participated in [Coding Ninjas Summer Hackathon](#)
- Participated in [Gen AI Mastermind by Outskill](#)

Education

IMS Engineering College, AKTU B.Tech in Computer Science Engineering	2023 – Present
Bhagirath Public School Class XII – 73.8%	2022 – 2023
Bhagirath Public School Class X – 78%	2020 – 2021
